Subject: RE: Final Destructive Testing Response Final Package for Release on Monday

Thanks Lene. Since I am not in the office, working remotely, and Steve and Lyndsey are not in, we are not able to send the letter today. I'd like to send the letter on Monday and its likely we won't get this onto our website until Tuesday or Wednesday. That would allow the Navy to have the letter for a couple days. We should also call congressional contacts before posting.
Let's regroup Monday morning when Steve is back.
Are you ok with the two sentences we suggest for the website?
Nicole

Subject: RE: Final Destructive Testing Response Final Package for Release on Monday

Hi Nicole,

Roxanne reviewed the documents. I believe the letter is fine, which she signed, but we made one change to Enclosure 1, which was to define TIRM in the first paragraph (Tank, Inspection, Repair, and Maintenance), since that acronym was used multiple times and not defined. From our meeting earlier this week, we thought the plan was to give the Navy the letter today and upload to the website on Monday, to give the Navy an opportunity to receive and review the letter before website posting. Do you have different dates?

Roxanne, please coordinate with Nicole. I have a couple of meetings and hearings this morning.

Thanks,
lene

Subject: [EXTERNAL] RE: Final Destructive Testing Response Final Package for Release on Monday

Hi Lene
  Both Steve and Lyndsey are out today. Please let me know if the letter and language to be placed on website are acceptable and send me the signed letter. As Steve indicated we are hoping to send to Navy on Monday, March 16.
Thanks
Nicole

Subject: Final Destructive Testing Response Final Package for Release on Monday

Resend of text from website and compiled PDF of destructive testing response to be sent and announced on Monday.

Lene: please find below text for the document link on our website. My understanding is that you and Nicole discussed having this on the website.

The Regulatory Agencies are disapproving the *Destructive Testing Results Report* because we do not concur with the finding that the destructive testing validated the non-destructive testing (NDE) process specific to the Red Hill tanks. The Regulatory Agencies are requiring the Navy to conduct further evaluation and improvements to the tank inspection process.
